PROFILE

Dynamic **Game Developer** with over **2 years of hands-on experience using Unity**, including professional industry experience with **Banzan Studios** and **Technocil**. Experienced in developing **2D, 3D, and VR applications**, with practical implementation of **hand tracking technologies** for immersive experiences. Proficient in **C# programming, state machine architecture**, and key Unity systems such as **Unity Timeline** and other core engine tools. Passionate about building engaging gameplay systems and continuously expanding expertise in modern game development technologies.

SKILLS

Game Development	Version Control	Adaptation
Debugging	Effective Teamwork	
State Machine	Communication	

TOOLS

Unity	VR	Git
C#	Hand Tracking (VR)	

PROFESSIONAL EXPERIENCE

Junior Unity Developer - Trainee, Technocil Pvt. Ltd. , Trivandrum, Kerala, Dec 2025 – Present

- Developed and shipped 3 cross-platform applications (2D, 3D, VR) in Unity across Windows and WebGL builds, implemented a hand-tracking interaction system for VR using [SDK name].

Intern Game Developer, Banzan Studios, Kochi, Kerala, Feb 2025 – May 2025

- Developed a 3D platformer demo project, showcasing proficiency in game mechanics, physics, and level design.
- Developed a 2D shooter / Platformer.
- Worked with sprites, animations, and UI elements to create an engaging player experience

EDUCATION

Bachelor of Computer Application, Kannur University, Sep 2021 – May 2024

Higher Secondary Education, Govt. Higher Secondary School, Chorode, Jun 2019 – May 2021

TECHNICAL EVENTS

Global Game Jam (GGJ) 2025, Kochi, Kerala, Jan 2025

Participated in the 48-hour game development challenge held at Kerala Startup Mission (KSUM), Kochi. Collaborated as part of a three-member team, leading the design and implementation of core game mechanics and development.

PROJECTS

Boy — *3D Third-Person Adventure — Windows*

- Solo project. The player navigates a level guarded by cube-shaped patrol enemies to retrieve a diamond.
- Implemented third-person movement (walk/run/jump) and a state-driven enemy AI — patrol, detect, and chase behaviors — plus a “freeze to evade” mechanic requiring the player to stay stationary to avoid detection.

2D Shooter — *2D platformer/Shooter — Android*

- Solo project. Cube-based player character with ranged combat against waves of enemies.
- Designed three enemy types with different health values determining bullet count and damage, plus two collectible types (health pickup, temporary attack buff).

DodgeBall — *2D Mobile Game — Android*

- Solo project, built for the Banzan Studios internship selection process.
- Built touch-based ball control where the player dodges incoming enemy balls from randomized directions while collecting items.

HappyPop — *3D Game — Android*

- Built with a team of 3 during Global Game Jam 2025 (48-hour development window).
- Designed a run-and-pop bubble mechanic with environmental hazards (steps, head bumpers); later ported and rebalanced the build from mobile to desktop.

Chase The Box / Chase The Box 3D — *2D & 3D Endless Evasion — Android*

- Solo project. Built a chase/evasion game with enemy pursuit AI.
- Developed a 3D reimagining of the original 2D version, reusing core mechanics with enhanced, darker visuals.

EMBER — *2D Detective Game — Android*

- Solo project. Designed an episodic, case-based level structure where each level unlocks a new investigation with narrative cutscenes.
